

Quilt-Pro

The fun & easy way to create quilts

Block Index for Quilt Pro 3 Macintosh Version

[Click here to begin....](#)

How to Use the Block Index

Use the Block Index to find which folder a block is located in. Blocks are listed alphabetically by letter. Blocks that start with a number are listed in the Numbers topic.

Finding a Block and its Folder

In each letter listing, you will find the name of the block and the folder. Sub folders are listed after the main folder and are separated by a slash. For example, the block *Leaf Frog* is in the *Five\Blocks with Sashes* folder which means that *Blocks with Sashes* is a subfolder of the *Five* folder.

When you look in the block browser, look first in the *Five* folder, then look in the *Blocks with Sashes* folder to locate the *Leaf Frog* Block.

Looking at Blocks by Letter

To see a listing of blocks by letter, click the Numbers or the appropriate Letter.

Blocks Beginning with Numbers

Beginning with Letters: A B C D E F G H I J K L M
N O P Q R S T U V W X Y Z

Note on Block Names

A single block can have several different names and different blocks can have the same name. The blocks listed in the block index are also the filenames of the blocks in the Quilt-Pro Block Library. Consult the Block Browser to make sure that the name of the block is the actually the block you are looking for.
